The theme for this year's conference is *Economics at the Edge*, and focuses on 1) Theoretical alternatives and ideas for economic policy, 2) SFC and other new approaches to modelling, and 3) Pluralism in economics teaching. Aalborg University employs problem-based learning teaching methods, where pluralism is an integral part of the economic curricular. As such, the conference theme is very close to home for us.

We look forward to reviewing your abstract, and seeing you here in April 2017.

Yours sincerely,
